The people who want the right to profit from selling bomb parts...

want to take away your human rights to protest against the killing fields.

EDO MBM are trying to suppress the campaign against them by saying protest is harrassment. They are abusing the stalking act in an attempt to outlaw peaceful protest. The law company specialising in this sort of junction is making millions from eroding our basic human rights while telling us how much they respect the right to protest. With the EDO campaign it is time to say enough is enough, and stand up to protect our basic human right to protest. If it doesnt stop now, then they will penalise all legitimate protest in this country. Protest that is not effective is protest not worth having. Contact the lawyer, ask him to stop taking money from warmongers and leave our rights alone.
